Story 5

“A dog can share another dog’s post”

- Suppose a dog is logged in, viewing the feed page feed page(see story 1)
Pre condition to the story being possible
- On any visible post , there is a share button
- The logged in dog can click this button to share the post to their own feed
- The post is then shared ,refreshing the feed will show the post.

“A dog can become friends with another”

- For instance a dog could make a friend request and another dog could accept it .

“A new dog can sign up”

- On the sign up page a new dog is require to place a username,their gender and also create a stong password that they could remember.
